

Personalize These Postcards ...

Then **Send & Share!**

Use the template on the following page to print out spring postcards that kids can decorate and share with classmates, family, and friends.

- We left space on one card to add a personalized greeting.
- Encourage each student to write a handwritten note on the reverse.
- Use markers, colored pencils, or crayons to add color to the designs. (Coloring helps work fine-motor skills!)
- Choose white construction paper or a heavier stock for copying or printing so the cards have some staying power.
- Use Avery postcard template 8387.
- As an alternative, take a photo or scan the finished card and share by e-mail or social post.
